# **Meeting 5**

## **21st April 2022**

### **Attendees**

• Aidan, lan

## Agenda

- Go through proposed code and write user stories
- Add stories to github project
- Assign stories to individuals
- Draw up ground rules about branch naming, writing tests, and making pull requests

#### **Notes**

We have agreed to use Flake8 and Pylint on our codebase. We should run bandit for any potential security issues

Make branches - needs at least one tick before being merged into develop. When you open a PR, post a message on Slack asking for reviewers

### **Actions**
